What's included

Models (apps/core, migration 0004)

- ✓ **Statistic** — label / value / prefix / suffix / order / is_active. Editable homepage numbers band so figures stay honest as the portfolio grows.

✓ **Client** — name / logo / type / website / order / is_featured; Type = client / partner / main_contractor.
- ✓ **TeamMember** — name / role / qualification / group / photo / order / is_active; Group = leadership / engineering / support; display_name helper (Eng. Jane Doe).

Dashboard CRUD (Editor + Administrator)

- ✓ Full list/create/update/delete for all three, reusing FilterableListMixin (search, filters, HTMX partial swap, pagination).

✓ Forms with grouped fieldsets, urls, and list/_table/form/confirm_delete templates per model.

✓ Sidebar: **Clients, Team, Statistics** added under the Content group.

Public (home)

- ✓ Numbers band renders editable **active** Statistics when present, otherwise falls back to the computed years/projects/services/certs band — so the page is never empty before the client adds content.

✓ New **clients & partners** logo band (grayscale → colour on hover), shown only when clients exist.
