feat(brand): DCLtd logo — favicon, app icons & footer

Adds the supplied **DCLtd** logo to the site. I **traced your actual artwork** with potrace (JPEG → threshold → SVG) so the result is the *same* logo made crisp — not a redraw — exactly matching what you sent.

What's included

- ✓ **Vector assets** (static/img/): logo-dcltd.svg (faithful black) + logo-dcltd-white.svg (white knockout for dark surfaces), plus transparent PNG fallbacks.
- ✓ **Favicon**: static/icons/favicon.svg — a navy rounded tile with the white mark; linked in <head> with the PNG kept as a fallback.
- ✓ **PWA app icons**: icon-192/512/maskable regenerated in place as branded navy tiles (filenames unchanged → **manifest untouched**).
- ✓ **Footer**: brand block now shows the white logo instead of plain text. The full company name stays in the header and the footer copyright line.
