What's included

Model (apps/media_center, migration 0001)

- ✓ **GalleryImage** — title / image / caption / category / related_project / order / is_active, with an active() queryset.

Public (/gallery/)

- ✓ GalleryView merges curated **GalleryImages** with **ProjectImages** flagged show_in_gallery (published projects only), normalised to a single item shape — curated images lead, then project photos.
- ✓ Filterable grid (category chips, derived from GalleryImage categories + project sectors) + **Alpine lightbox** with caption. Empty and filtered-empty states.
- ✓ "Gallery" added to header, mobile menu, and footer.

Dashboard

- ✓ Full **GalleryImage CRUD** (Editor + Administrator), reusing FilterableListMixin (search/filter/HTMX/pagination) and the image-preview form field.
- ✓ list / _table / form / confirm_delete templates; sidebar entry under Content.
