What's included

Sitemap & robots

- ✓ **apps/core/sitemaps.py** — StaticViewSitemap (home, about, services, projects, ongoing, gallery, downloads, certifications, quote) + ServiceSitemap and ProjectSitemap (published only, lastmod from updated_at).
- ✓ **/sitemap.xml** via django.contrib.sitemaps, **/robots.txt** view that disallows /dashboard/ + /admin/ and points crawlers at the sitemap.

Meta & Open Graph

- ✓ Canonical link + og:* / Twitter-card blocks in the public base template, each **overridable per page**, with SiteSetting fallbacks (default OG image).
- ✓ Project detail → og:type=article + hero/ og_image; service detail → og title/description/ image overrides.

Structured data (JSON-LD)

- ✓ **Organization** markup site-wide via a structured_data context processor (name, logo, slogan, address, email, contactPoints, sameAs). Skipped on /dashboard/ and /admin/; < is escaped so the payload can't break out of the <script>.
- ✓ **Service** (@type: Service) and **Project** (@type: CreativeWork) markup on detail pages.
