

IN THIS UPDATE

feat(i18n): Swahili-ready i18n scaffold (toggle hidden until translated)

Optional Phase 3 item — wires the site for **English / Swahili** without shipping machine-translated copy on a client credibility site. Built as agreed: full machinery + blank catalogue + hidden toggle (you fill the Swahili, then we flip it on).

What's included

- ✓ **Django i18n enabled:** LocaleMiddleware, LANGUAGES = en/sw, LOCALE_PATHS, the set_language URL, and the i18n template context processor.
- ✓ **Strings marked** with {% trans %} across the **site chrome** (desktop + mobile nav, footer, CTA band, skip link) and the **homepage** (hero, stat labels, section headings, "why" cards, clients band).
- ✓ **locale/sw/LC_MESSAGES/django.po** generated with makemessages — **46 strings, all msgstr blank**. Untranslated strings fall back to English, so nothing half-translated can ever go live.
- ✓ **Language switcher** partial (posts to set_language) gated behind **SHOW_LANGUAGE_TOGGLE** (default off) — no dead toggle ships until the catalogue is filled.
