

IN THIS UPDATE

Phase 1 — Certificates: compliance module, validity chips, expiry alerts

Adds the **Certifications & Compliance** module — the credibility credentials. A Certificate model with validity tracking, an Administrator-only dashboard CRUD with expiry alerts, and a clean public Certifications page (cards + download-on-demand, never raw scans).

What's included

- ✓ **Model:** categories (registration / tax / license / accreditation / safety / completion), issue & valid-to dates, computed status (current / expiring / expired), public() / needs_attention() querysets, download helper.
- ✓ **Seed:** 8 verified statutory documents from the profile (§7) — Incorporation, TIN, VAT, Tax Clearance, Business License (Electrical Class I), CRB (Specialist Contractor Class One), OSHA, WCF. **VAT number left blank** (the PDF shows two different numbers — flagged for DIEYNEM).
- ✓ **Public:** /certifications/ page — credential cards grouped by category with status chips and download links. **Expired certificates are automatically hidden** from the public page.
- ✓ **Dashboard:** Administrator-only CRUD with an **expiry-attention banner**; the overview now shows live project/service counts and a **compliance alert** for certs expired/expiring within 60 days.
