

IN THIS UPDATE

docs: go-live report — website live, secured & auto-deployed

A client-facing **Go-Live Report** confirming the website is publicly live and working well.

- **Live:** dieynem.bjptechnologies.co.tz — HTTP 200
- **Secured:** valid Let's Encrypt certificate (through 13 Sep 2026, auto-renewing); HTTP→HTTPS 301 redirect active
- **Shipped:** production release **v1.0.0** via the tested auto-deploy pipeline

Same house style as the Phase 3 report (navy/amber, plain-language for the client). Adds `dieynem_golive_report.html`; the branded PDF lives in `deliverables/` (local, like the other client documents).
