

IN THIS UPDATE

Phase 1 — Site settings singleton + dashboard form + live footer

Adds the central **Site Settings** so the company's identity, contact details and branding are managed from the dashboard instead of being hard-coded. The public footer now shows live, editable information.

What's included

- ✓ SiteSetting singleton model — company name, motto, P.O. Box, address, phones, emails, map embed, social links, footer text, logo and default social-share image. Stored as a single row.
- ✓ Seed migration populates verified details from the company profile (p.2); the disputed plot number is intentionally omitted pending confirmation.
- ✓ **Administrator-only** dashboard settings form (branded, sectioned, with save confirmation).
- ✓ Settings exposed to all templates via a context processor; the public footer reads them live.
