feat(dashboard): dark mode with navy surfaces

Phase 3 · item 6 — Dashboard dark mode (navy surfaces).

UPDATE #32 progress item	FILES UPDATED 3 in this update	COMMITTS 1 changes bundled	QUALITY CHECKS In progress automated tests
---	---	---	---

What's included

- ✓ **Header toggle** (sun/moon) flips an `html.dark` class and persists the choice to `localStorage`; a tiny **pre-paint `<head>` script** re-applies it before first render, so there's **no light-mode flash** on load.
- ✓ **Theming via a scoped override layer** keyed on `html.dark` in the dashboard base — it remaps the handful of surface utilities the dashboard actually uses (`bg-white` cards, `bg-slate-50`, borders, slate text, inputs, the `bg-white/90` sticky save bar, the `::file-selector-button`) to navy equivalents.
- ✓ **`html.dark` is only ever set on the dashboard** — the public site shares no template and is completely unaffected (tested).
